Alert and Powerful

Superb action both in traffic and on the open road has won world-wide demand for the Ford car. This great performance, together with remarkable beauty of line and color, makes every owner of a Ford car its enthusiastic champion. A short turn behind the wheel will explain such staunch pride of ownership.

Ask our Sales department to let you drive a Ford car. They will be glad to take you out. Select the steepest hills, the heaviest going—you will be amazed at the power at your command. Make for the thickest traffic. Drive alongside other cars. Try the quick getaway, the swift pickup in second, the easy gearshift. Feel the smooth, sure action of the six-brake system. A demonstration will convince you of the outstanding merit of the Ford car. Drive it yourself, there is no better test.

Time Payment—If you prefer to buy out of income, you will find the authorized time payment plan most attractive.

IN AND AROUND THE CLUB

Of course you'll be at the bridge

tournament next Tuesday.

Things are moving slowly these

days—not even a new joke to spring.

Pete was around last week after

his car accident and did not look so

good. It won't mix with gas Pete.

Notice the boys are having some

indispensable articles added to their

room equipment—pretty nice too.

Frank is taking Theron and Dannie

to Edmonton this month. Such is

fame.

Wonder what kind of substitute the

phone makes. Ask Bill.

Tex is busy figuring out the next

fight card. Bet it's a good one.

The football boys are getting anx-

ious about a team.

Wonder what Uncle and Cousin

have up their sleeves? Something

funny we know.

See the auditor around the club?

We'll soon know what we did with

our last year's earnings.

PARK FOR MARQUIS M. D.

Town Planning Commissioner Sey-

mour addressed a meeting of the rate

payers of the Marquis municipality

last week concerning the future of

the municipal park which is located at

Lake McGregor. The park includes a

sports ground, bathing beach and other

attractions and its development is

regarded as being an important con-

sideration, not from the tourist point

of view, but also as a recreation area

for a large part of the territory

which surrounds it. The decision ar-

rived at unanimously, following Mr.

Seymour's address was that a plebis-

cite be taken of the ratepayers asking

the council to devote \$3,000 a year

to park purposes during the next

five years. Committees were appoint-

ed to secure the necessary publicity

for the support of the measure.

On the occasion of his visit the com-

missioner inspected the town park

site at Milo and outlined a scheme

for the beautification of the same.

Milo's tree planting bee will take

place this spring.

AN ALL 'ROUND ATHLETE

A Vulcan visitor last week was Mr.

E. J. Don Rowand who was twice do-

minion welterweight boxing cham-

pion, and several times Manitoba

champion; he also held, in 1922 and

1923, the Canadian 117 lb. champion-

ship won under the auspices of the

Winnipeg Police A.A.A., and for this

he is the proud possessor of a "hand-

some gold watch.

That boxing is not the only accom-

plishment possessed by our recent

visitor is evidenced by the fact that

he holds a trophy for rowing won at

the Canadian Henley in Winnipeg

under the management of Winnipeg

Rowing Club. His success was at-

tained in the Junior Fours.

Mr. Rowand is at present represent-

ing Messrs. Black and Armstrong of

Calgary and the Phoenix Insurance

Company of London, England, and

was transacting business with Mr. H.

PUBLIC NOTICE

By the Board of Trustees of The Vulcan S. D. No. 1902 of the Province of Alberta.

WHEREAS it is deemed expedient by the Board of Trustees of the Vulcan S. D. No. 1902 of the Province of Alberta, that the sum of Thirty Thousand dollars should be borrowed on the security of the said District by the issue of Debentures repayable to the bearer in Thirty equal consecutive annual instalments with interest at the rate of not more than eight per centum per annum for the following purposes, namely:

Building and Equipping a Solid Brick Addition consisting of Six Rooms, to be connected to forming a part of present Brick Building.

THEREFORE notice is hereby given by the Board of the said District that unless a poll of the ratepayers of the said district for and against the said debenture loan is demanded as provided by The School Act, the said Board will apply to the Board of Public Utility Commissioners for authority to borrow the said sum by debentures.

Of which all persons interested are hereby notified, and they are required to govern themselves accordingly.

C. H. HOSKYN, Chairman.

Certified a true copy

A. J. FLOOD, Sec.-Treas., S.D. No. 1902

Dated at Vulcan this 8th day of April 1929.

INSTRUCTIONS TO RATEPAYERS

A poll may be demanded by any four ratepayers of a rural school district, by any ten ratepayers of a village school district by any twenty ratepayers of a town, consolidated or rural high school district, but no poll may be demanded when the loan is for the purpose of building a first school house and does not exceed—

(a) in any district other than a consolidated district, \$2,000.

(b) in a consolidated district, \$5,000.

Every demand for a poll should be delivered to the Secretary of the district, or in his absence, to the Chairman of the Board of Trustees, within fifteen days from the date of posting of these notices. A certified copy of the demand should be forthwith forwarded to the Board of Public Utility Commissioners of Alberta at Edmonton.

The Vulcan Advocate

An Independent Weekly Newspaper issued every Thursday afternoon, at the office of publication, Vulcan, Alberta. Subscription price per year, in Canada \$2.00, United States and other countries \$2.50. Advertising rates furnished on request.

VULCAN ADVOCATE

VULCAN, ALBERTA
CHARLES CLARK - Proprietor
TOM WHITTINHAM, Editor-Manager

BUY FROM VULCAN STORES

The housewife usually regards the peddler who comes to her door, and the mail-order catalogue which the postman brings as twin nuisances. But too often she buys from both, impelled by the same human motive that results in the sale of worthless stocks "It might be a bargain this time," she thinks. But it never is. When worthwhile merchandise is available for free distribution, or for sale at less than cost of manufacture, Vulcan merchants will be found in the utopian vanguard. For that is how progressive they are. Vulcan merchants and business men sell articles of a given quality for considerably less than the price asked in cities and by peddlers. The explanation is found in lower overhead and smaller profits, plus a personal interest in satisfying their customers. When you spend your money with them you are not only a good citizen; you also get more for your money.

YOUTH

Youth is not a time of life—it is a state of mind. It is a temper of the will, a quality of the imagination, a vigor of the emotions. It is a freshness of the deep springs of life. Youth means a predominance of courage over timidity, of the appetite of adventure over love of ease. This often exists in a man of fifty more than in a boy of twenty. Nobody grows old by merely living a number of years. People grow old by deserting their ideas. "Whether seventy or sixteen, there is in every being's heart the love of wonder, the amazement at the stars and the starlike things and thoughts, the daunted challenge of events, the unfulfilling childlike appetite for what next, and the joy and the game of life. You are as young as your faith, as old as your doubt, as young as your self-confidence, as old as your fear, as young as your hope, as old as your despair. In the central place of your heart there is a wireless Brown Torgery draw last week, get-sages of beauty, hope, cheer, grandeur, courage, and power from the earth, from men, and from the infinite, so long as you are young."—Harris Dibble.

A WORD IN SEASON

As the busy tourist season opens soon, and many strangers will enter our gates, officers of National Revenue brought into contact with the travelling public are reminded once again that courtesy and tact are essential. Courteous and willing service must be rendered on all occasions and under all circumstances. A discourteous disposition is the strongest ally a man has in dealing with his fellow man. "Crude" has never paid a dividend in Canada but has—National Revenue.

I. C. Sollov

an aim to encourage

Alberta's oil field, points out

ner Valley is supplying only

per cent. of the gasoline required

Western Canada. Crude oil can be

imported cheaply, its production is

not important, but the quality of na-

phtha found at Turner Valley is of

immense value, with expanding possi-

bilities. There is every reason to speed

up development in Alberta oil. Hoover

has warned Americans that their sup-

ply of oil and gas would be exhausted

before many years and they would be

obliged to import.

WHAT WOULD YOU DO?

"The law is a hass." There is good authority for that.

In Brooklyn, N.Y., last week a bandit tried to hold up a taxidriver. The taxidriver, Dearoff, is a married man with three children. He didn't want to lose his money or his job, so he knocked the gun from the bandit's hand. When the latter fled, he took possession of the weapon.

Cruising round for a policeman to hand the gun to, he picked up a fare. It was nearly an hour later before he "stopped a policeman, and handed over the gun. The policeman promptly put him under arrest for not having a permit to carry the gun.

Next morning Dearoff was brought before a magistrate who agreed that Dearoff ought never to have been arrested, but said he had no alternative under the law but to commit him to a higher court on a \$500 bond. As Dearoff did not have the \$500 he was led away to jail to wait till Special Sessions for trial.

What would you do if you were in Dearoff's position under a law like that? It would take a real humorist to see the joke in the situation.

Here is another that comes to light in our own Canadian courts. A man in Ontario is sentenced to death. His friends get up a petition for a reprieve. If reprieved, his sentence will be transmuted to imprisonment for life.

He has a wife and three children. If he is executed his wife will qualify as a widow under the mothers' pension law and receive allowance for herself and children. She will also be free to marry again should she so desire. On the other hand if her husband is reprieved, she will be refused a widow's pension for herself and children. And she will not have the right of remarriage. She must struggle along as best she can, till death.

Has any dramatist ever conceived a plot more poignant than the lot of that woman as she balances the claims of duty to her husband, to her children and to herself, under a law which rewards her if he dies, and penalises her if he "receives clemency."

What would you do if you were in her place.

NOTES AND COMMENTS

A man in a neighboring town who has had three wives says he got two single-handed and one assist.

They are having a plebiscite in Nova Scotia to ascertain what sort of liquor laws the people want. A man from there says prohibition is sure to carry because Nova Scotia has such a magnificent coast-line.

The Japanese Experimental Farms are ordering Canadian hatching eggs and breeding birds, as a result of a steady publicity campaign. Canadian shipments are also going to the Philippine Islands.

Every farmer and owner of land can improve the appearance and enhance the value of his property by the planting of trees either in small or large numbers, and by having his name legibly stamped on his mail box.

What will be left? The provincial government now takes theatre tax, motor license fees, motor drivers' fees, amusement tax, gasoline tax and proposes to now heap on twenty per cent. of old age pensions. Well might it be asked, what will be left?

A train pulled out of El Centro, Imperial Valley, California, last week made up of one hundred and seventy cars, every one loaded to the last inch with lettuce intended for the market of the northern and eastern states. There should be a few good salads in that load.

Hon. Arthur Meighen sounded a warning regarding war in a recent speech. He said: The Great War the gravest warning ever sounded for the world. Another war would mean disaster for all nations. There would be no victory. Every country would lose. There may be some gallantry in a contact between opponents on a battlefield, but there is no gallantry in a war of chemistry. There will be no victories in future wars—only deadlocks, and extermination of human hosts by science.

GAME ASSOCIATION

The objectives of the Dominion Fish and Game Association are as follows:

To same wild life from extinction in Canada.

To increase Canada's wild life resources by means of preservation and by stocking.

To introduce new species of game birds, game animals and game fish that will thrive in Canada.

To spread knowledge of Canada's wild life and its value as a national resource through the Dominion and Provincial governments, through the Dominion and Provincial Fish and Game association, through the schools and colleges, through the press, through the community clubs, and through any other reasonable and available agencies.

To encourage the establishing of fish and game sanctuaries, both federal and provincial.

To co-operate with the United States in respect of stocking and protecting international streams, capable of supporting game fish.

To discourage the market sale of game birds, waterfowl, game animals or their flesh, and game fish.

To urge the destruction of vermin, which, in its turn, is destroying Canada's useful wild life.

To conserve the forests and to prevent forest fires.

To safeguard the wild life of Canada primarily for the benefit of the people of Canada.

To discourage the use of public domain or streams for private and self-fish purposes.

To urge the big land-owning companies, lumber companies and railway companies to set aside desirable areas as game sanctuaries; also lakes and sloughs as waterfowl sanctuaries.

To encourage farmers, ranchers and private and corporate owners of big land areas to establish game farms.

To encourage the study of the habits of game birds, waterfowl, big game and game fish with a view to gathering information which will assist the conservation and propagation effort.

To encourage the study of regulations affecting fur-bearing animals with a view to standardization that will assure conservation and an increasing supply.

To prevent pollution of national and international waters which contain game and commercial fish.

To introduce new game fish into Canadian waters.

To co-operate with the U.S. Biological Survey in respect of study of migratory birds and preparation of help regulation.

To arrange for reciprocity between provinces respecting fishing and hunting licenses, it to be understood that such reciprocity does not abrogate payment of fee in each province.

To investigate types of guns and fishing tackle reported to be unduly destructive to game and fish.

To investigate conditions under which visiting sportsmen from other countries bring in their guns, ammunition, dogs, fishing tackle, automobiles and other equipment.

The Dominion Fish and Game Association is urging a concerted campaign throughout the Dominion, to exterminate pests which are destroying wild life.

Crows and magpies are outstanding marauders. They do inestimable damage through raiding nests and the young broods of game birds.

Certain hawks and owls—the Great Horned Owl, the White Owl and the Northern Falcon, all winter visitors, wipe out covey after covey of game birds.

Coyotes, half-wild cats, wolves and other vermin should be discouraged.

Locally a fine start was made last year in this war of extermination. The energy of the school children was enlisted, prizes were given, and by the combined efforts of young and old the crop of pests was distinctly depleted. In addition to this the Department of Agriculture awarded checks on receiving records of the work done.

There is no doubt that the same vigorous attack will mark this season and that the services of all will be required to diminish the army of persistent and evil pests.

The Kincardine Review suggests that if Chicago were choosing an emblematic flower "the crocus" would be suitable.

When Old Age Pensions finally are established and running smoothly, some poor and needy cases amongst the aged may be the happier. But in the meantime, the government's are passing the buck so assiduously that the benevolent spirit which first characterized the move seems to be shrinking.

The Dominion pays fifty per cent. In Manitoba the whole cost of pension is levied against municipalities, including cost of administration. In Ontario the bill, when passed, will ask municipalities to pay twenty per cent., the province paying thirty per cent., and administration costs. In Alberta the municipality pays ten per cent. The provincial governments work on the theory that municipal authorities know best local conditions, and in many cases will save money on local charities.

PACIFIC GROWTH

Agnes Lant, writing in the Review of Reviews, gives facts to show why the Pacific Coast is optimistic.

"After the war every section of the Pacific Coast lay flat on its back. See it today!"

"This year the Canadian National will put four, if not six, new vessels on the Inland Passage Way to Alaska."

"The Japanese Nippon is building two new liners. The Matsons are building two new vessels for Australia traffic. Nine new Italian liners are travelling from Vancouver to the Orient and through Panama to Europe. Two big lumber companies are obliged to build their own vessels to fill their contracts with Australia."

"This year the grain exports of the North Pacific ports—Vancouver, Seattle, Portland equalled 192 million bushels, or almost half the total grain outgo of all Atlantic ports."

In Vancouver the Canadian Nationals are going ahead with a four million dollar hotel. The Olympic Hotel in Seattle was considered a wild gamble, yet it paid for itself in the first year and has to add 400 rooms this year."

Thirteen pulp and paper projects from Alaska to Portland got under way."

Eleven new factories opened up in Spokane during the first six months of 1928."

This amazing prosperity has created a great spirit of unity on the Pacific Coast. All parts have united tourist associations, united freight traffic conferences, united lumber associations."

Behind the phenomenal expansion is first, climate. A climate where people can enjoy work or play, 300 days out of 365 and where living—barring taxes and clothing—is relatively cheap."

A second reason is the wakening Orient, with its masses that need lumber, motors, grain, etc. A third reason is the great wealth of resources on the Western slope. They have the goods—lumber, fish, fruit, water power. Better facilities by rail and ship are also powerful factors."

THE OIL RACKET

(As Lethbridge Herald Sees It)
Dalhousie, Freehold,
Regent and Home—
Yes, oil is the theme
Of this little poem.

Pa's buying Spooner
And Ma A. P. Con.
And sister bought Dallas
Till her savings were gone.

Kid brother bought Devenish,
The maid picked McLeod;
And when Pa yelled "Lay off it!"
The whole household rowed.

The days were all sunshine
And song filled the night
TILL one bright morning
The bears started to bite!
Pa's silent tonight in the old leather chair;
And Ma's mending stockings again—
Uncle Harry is blinking and soberly thinking
How it dropped to a dollar from Ten!

C. F. S.

IN LIGHTER VEIN

The following is a telephone conversation overheard by the editor:—

"Are you there?"
"Who are you, please?"
"Watt."

"What's your name?"
"Watt's my name."
"Yeh, what's your name?"
"My name is John Watt."

"John what?"
"Yeh."

"I'll be around to see you this afternoon."

"All right. Are you Jones?"
"No. I'm Knott."

"Will you tell me your name then?"
"Will Knott."

"My name is Knott."
"Not what?"
"Brr, clank, etcetera and so forth—
Wright Engine Builder."

The Greatest March in all McLaughlin -Buick History

THE motor-car buyer... the final judge of automobile values... has registered enthusiastic endorsement of the revolutionary advances made by the 1929 McLaughlin-Buick!

During the past month, McLaughlin-Buick sales have been 25% greater than March of last year... greater than any previous March in all McLaughlin-Buick history.

More people buy McLaughlin-Buick than any other car at or above its price... because the 1929 McLaughlin-Buick with its Masterpiece Bodies by Fisher, has unquestionably established a new standard of performance and a new order of beauty.

Get behind the wheel and get the facts!

ITEMS OF INTEREST

If you want to know how kids turn out, watch them when they turn in.

And the question after that is which party is in the majority.

A fair guess is that the people who are prosperous and admit it are in a hopeless minority.

Advice is like cigars. There are only two kinds: Good ones and the kind we get from our friends.

Party papers are quarrelling as to whether or not the government should get credit for the prosperity of the country. The next question is who shall get the blame from people who don't believe they are prosperous.

Announcement is made that Northern Aerial Minerals Explorations Ltd will bring three machines to Edmonton. These are to be used in exploring the region north, north-east and north-west of Alberta.

Easter Sunday was by no means a day for flaunting spring apparel. Most people clung gratefully to their heavy winter clothing regardless of fashions decree, and the festive spring bonnet was little in evidence. boom. It is real growth.

Those good Canadians who think we are under a moral obligation to stop the export of liquor into the United States should be told that the question is: "Am I my brother's keeper?" It doesn't say a word about your uncle.

Some members of parliament counsel against making any tariff changes that look like retaliation. Many many years ago, "Punch" gave Canada similar counsel in rather unusual poetry, one verse of which ran as follows: "The forthcoming visit of the district engineer."

Major-General Bullard, U.S.A., retired, has been rebuked for lending his name to a cigarette advertisement. It is doubtful if cigarettes sales will fall off in consequence, for as a rule people smoke the kind of cigarettes they like because they like them, and not because somebody else does.

The British Columbia government is to start shortly on the construction of a wide, safe road from the Alberta boundary at Crow's Nest, westerly to the flats. This is one of the most dangerous parts of the entire highway, and motorists will be glad to learn that improvement is to be made.

Local hide dealers at Lethbridge are paying as high as 40 cents for good rabbit skins, and those which have been handled with extra care are bringing much higher. An acute shortage seems to exist, probably as a result of rabbit drives conducted in the past two seasons.

Winter mail is now being carried by aeroplane more than 1,000 miles north of Edmonton. Fort Good Hope, 400 miles north of Fort Simpson, is to be the northern terminus of the air flight, so Louis Romanet, general manager of the Athabasca-Mackenzie districts of the Hudson's Bay Company, announces.

There is a report of a new industry opening up at Medicine Hat, under the management of J. G. Moore, to manufacture a variety of articles in the nature of cleaning and washing preparations. Negotiations are under way with the city council for a five-year lease on firehall No. 2, as a premises which would be suitable subject to minor changes.

The name K. D. McTay Bridge and Building Master of the C.N. Railways at Calgary, is carried on a snowplow of new design being used for the first time on the Japanese Government Railways. The "McTay" snow fighter was the one chosen by K. Hashima of Japanese Government Railways, after a survey of United States and Canadian products of this nature.—C.N.R. Magazine.

The Governor General may have blundered in sending that message of congratulation to President Hoover, who is calling a session of Congress to pass legislation which is expected to be injurious to the farmers of Canada, but it was pretty decent of Premier King to accept responsibility for it. We have made many mistakes in our day but it was seldom indeed that anyone else came forward to say it was his fault.

HIGH PRODUCTION AT ANGUS

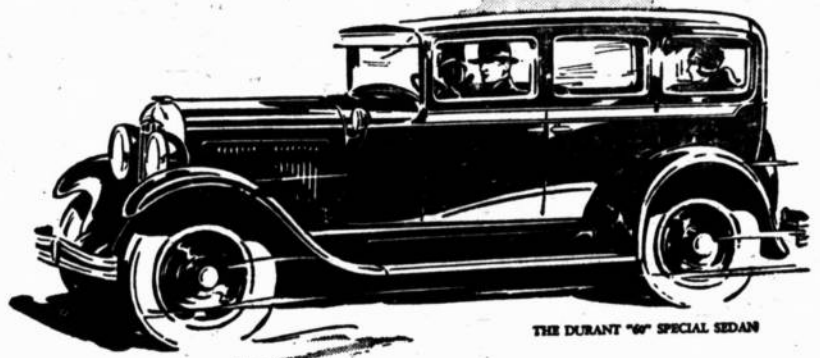

Here is shown one small corner of the Angus Shops. Inset, a section of the great machine shop. Lower left, transportation within the Shop and right, setting the wheels for a new 3100 locomotive.

Canada's increasing agricultural, industrial and commercial prosperity is making more and greater demands upon transportation and the country's railways must always be a long way ahead of the times in order to keep up with them. That, in a town within a city, sixty-five hundred men with a monthly pay-roll little short of a million dollars will be engaged all winter building, equipping and repairing rolling stock for one Canadian Company reflects not only the immediate benefits of a record crop year, but the encouraging and inspiring confidence of its directors in the continued prosperity of the country. This is particularly true when one realizes that the Angus Shops of the Canadian Pacific which employ these sixty-five hundred men and through them support, say, a community of at least

twenty-thousand within the city of Montreal, is not engaged in the actual construction of its freight cars and locomotives, that the frames for the passenger equipment are purchased outside and that these shops alone do not handle the whole of the repair work of the system, there being other shops in the west. The present volume of work and the probability of further increases are due to the orders for rolling stock that have been placed with various Canadian steel car construction companies. The steel frames are built at Hamilton and other points in Canada and are taken to Angus where the finishing is carried out. One hundred and six passenger cars, including sleepers, liners, first class coaches and other equipment will have to be handled shortly by the Angus shops, while at present the construction of 40 cabooses, 7 snow ploughs and 2 rail hoists is going on. At present, also, eleven repaired passenger cars and 120 freight cars are being turned out daily, and every five-hours and forty-five minutes shop time, an overhauled and repaired locomotive is returned to service.

The Angus shops of the Canadian Pacific Railway, situated on the eastern outskirts of Montreal, are the largest diversified railway shops maintained by any railway on the continent. They cover 300 acres of ground and handle each year upwards of 29,000 railroad cars of various sorts and descriptions. The first two of the 3,100 type of locomotive, the largest in the British Empire, were built at Angus by the company's own employees and from its own design.

There may be other
good places to buy farm
machines, but why waste
your time hunting for
them? We are here to
serve.

HOW TO OIL HARNESS
If you will fill a tub
half full of water then
pour in just about enough
oil to cover your harness
in the water, and as it
comes out it will gather
just enough oil to make
it soft and pliable. Of
course the harness should
first be scraped free of all
grease and dirt clots.

Joy stays with us as
long as we bid him wel-
come and pay the fiddler
for another dance.

Love is the flame and
marriage the extinguisher.

After explaining that
a biped was anything that
goes on two feet, the tea-
cher asked Johnnie if he
could name one. "Yes'm,"
returned Johnnie, a pair
of stockings."

TRY IT
Here's another limerick
with the last line missing.
If you can fill it in, you
are a better man than
your long suffering editor.

SAVES TIME
When the rush season
comes there are not en-
ough in the day to do
everything you want to
do. That is where the
McCormick - Deering
tractor owner has the ad-
vantage. He can work
early and late and all
night if necessary.

ITEMS OF INTEREST

Issued by Publicity Commissioner,
Department of Agriculture, Ed-
monton, April 5, 1929

Will Bridge Many Northern Streams
Two steel bridges and thirty bridges of wooden construction, will be erected in the southern part of the Peace River district during the coming season as part of the provincial government's road building program. One of the proposed steel bridges will span the Beaverlodge River near the new town of Beaverlodge, while the other will cross the Spirit River near Roycroft and many of the smaller bridges to be constructed will bring prosperous agricultural districts closer to railway transportation.

Purdy to Handle Pool Elevators
R. D. Purdy, manager of the Alberta Wheat Pool, in addition to his present duties has been appointed manager of the Alberta Pool Elevators Limited, it is announced from the Pool head office in Calgary. Mr. Purdy's appointment fills the vacancy created by the retirement of C. M. Hall who has occupied this position for the past two and a half years. T. E. Oliver, in addition to his present duties as assistant manager of Alberta Pool Elevators Ltd., has been named assistant manager of the Alberta Wheat Pool. These appointments bring all the departments of the Pool including the elevator system, under one central management.

University Feeders' Day Popular
A large attendance of farmers and stockmen is expected at the eighth annual Feeders' Day to be held at the University of Alberta farm on Saturday, April 13th. On this occasion the experimental and research work with beef cattle, sheep and swine which has been carried on by the Department of Animal Husbandry will be reviewed and the results of the various tests made available to any who are interested.

General satisfaction is expressed throughout the province with the results of the campaign to promote the use of better seed grain recently carried on under the direction of the Department of Agriculture. A marked improvement in the quality of seed used last year was noted as the result of a similar campaign and it is hoped that a corresponding improvement will be apparent in the 1929 crop.

Name Officers
Miss Edith Patterson of Calgary, was elected president, C. O. Hicks of Edmonton, first vice president, and Wm. Wallace of Camrose second vice president of the Alberta Educational Association for the ensuing year at the annual convention of the association held in Edmonton during the past week. A. J. H. Powell of Fort Saskatchewan, is the newly elected president of the Alberta Teachers' Alliance with C. G. Elliott of Edmonton as vice president. Regional representatives of the Alliance were named as follows: Calgary, Miss J. McCall; Edmonton, C. O. Hicks; Northern Alberta, Leslie Robbins, Waskatenau; Central Alberta, Miss E. C. Barcar, Red Deer; Southwestern Alberta, W. L. Irvine, Vulcan; and Southeastern Alberta, Mrs. J. N. Jakey, Drumheller.

Young Orators Enter Final Contest
Gwen Gant, age 17, of Grande Prairie and Walter MacDonald, age 18, of Red Deer were selected as the winners for Northern Alberta and Southern Alberta respectively in the finals of the Alberta division of the Canadian and International Oratorical contest on Thursday night. These two winners will later contend for the privilege of representing Alberta in the Dominion finals to be held at Toronto, following which the Canadian champion will compete for International honours at Washington.

NEWS OF INTEREST

S. S. Farms Being Revalued
Good progress is being made in the revaluation of farms occupied by soldier settlers according to announcements made by officials of the Dominion Land Settlement Branch. A good start was made with this work last fall and inspectors of the Settlement Branch will continue their duties along this line in many districts in the province as soon as road conditions permit.

Agriculturists Elect Officers
D. H. Galbraith, M.L.A., of Vulcan has been elected president of the Alberta branch of the Canadian Society of Technical Agriculturists for the year 1929. Professor R. D. Sinclair, University of Alberta, is the new vice president while J. M. Manson, also of the University staff, has been elected as secretary-treasurer and C. Tapp and Professor J. McGregor Smith have been named on the executive committee of the organization.

Baby Beef Brings Record Price
A record price was established at the Calgary Spring Show during the past week when the first prize calf in the Boys' and Girls' Calf Feeding competition sold for three dollars a pound. This calf, an Aberdeen Angus shown by Harold Richardson of Bowden, was an outstanding winner in its class. It was purchased by Mrs. Hind of Hind's Meat Market, Calgary, and at a weight of 940 pounds, brought its young owner the handsome return of \$2,820.

British Boys Arrive
The first group of British boys, forty in number, coming to Alberta during the present season under the arrangement between the Provincial Government and the Overseas Settlement Board arrived in the province during the past week. They have been equally divided between the schools of agricultural at Vermilion and Olds where they are being given a month's practical training in Canadian agricultural methods which will fit them for work on farms in the province. At the conclusion of their month's course another similar group is expected to arrive and following this two groups of British young women will come forward at intervals of a month for courses of training in practical home economics before being placed as domestic farm help.

FIRST STEP IN AVIATION

A medical writer in the Popular Science, says that the first step in taking up aviation is to have a thorough medical examination. Good eyesight would appear to be the first requisite. A flyer must read his instrument board and his map. He needs eyes that can see at a distance and can change focus quickly from far to near.

The normal individual has "central vision." That is, he sees what is directly in front of him. He has also a peripheral vision seeing objects at either side though not so clearly. If a person's field of vision is narrow he should not fly.

A military or commercial transport pilot requires good vision. Flying for your own pleasure you need not possess such superior sight. Flying is attended by physical and nervous strain. This does not tell on the sound stable person who flies about four hours a day regularly.

The ideal age for flying is from twenty to thirty years. It is possible to learn after thirty-five, but the chances diminish as your age increases. There are flyers over fifty who learned to fly late in life, but they are not fitted for commercial aviation. Middle age brings conservatism, slow reaction and a loss of physical resiliency that do not go with flying.

THE I'M ALONE CASE

The I'm Alone incident has in it everything that in the past has made such occurrences fateful. One side is able to claim that the schooner was a known offender against United States law, a flagrant challenger of coastguard authority, that she was caught in coastal waters and made off when the revenue boats gave her hot pursuit; also, it is claimed that the schooner refused peaceable seizure and defied gun-fire; that her conduct was such that no honest boat need have followed.

The other side can claim that the vessel was sunk two hundred miles from shore, that she bore a British flag, that no agreement had been or would be entered into by Britain and Canada assenting to such a sinking as this, and that the United States revenue cutters are on duty to prevent smuggling and not to administer death and destruction to any vessel suspected of the intention of wrongdoing.

This is a case, we think, where the United States officers took the most extreme course open to them, but the unwarranted shooting that occurred cannot be remedied by a resort to ten thousand times as much rash and foolish shooting. The outcome should be a considered agreement that will prevent the recurrence of any such incident and the payment of damages to the individuals who have suffered loss.

Whatever argument may be set up at Washington in support of the action of those who turned guns on the schooner, Washington is well aware that nothing but the good-will assent of Canada and Britain to the extension of the coastguard activities to the twelve-mile limit, instead of the three-mile limit gives Washington even the color of an excuse for what has occurred. A good-will concession of that kind should not be stretched, strained and abused. When it is said that the schooner must have been engaged in some form of trade even worse than rum-running to cause her to provoke the fate that befell her it must not be forgotten that the skipper of the schooner came of sea-faring folk on the Canadian Atlantic coast, reared in the belief that nobody dare fire on his craft on the high seas. He would naturally stand on his rights and refuse to be bullied. If the skipper's conscience were clear his case would be all the better, his decision the firmer. So that nothing to strengthen the case against him can be adduced from the skipper's contention that none had the right to molest him on the high seas.

The whole case will need to be analyzed by competent and judicial minds with a view to arriving at a just settlement of this case and a just agreement for the future—Toronto Star.

Dependable Auto Horns
In turning sharp curves when the view is obstructed, you know, if you are a driver, how much you depend upon your siren or horn to warn oncoming cars and enable you to travel over dangerous places in safety and assurance. If you have an inferior horn scrap it at once and get one of our superior ones. We sell only auto supplies of known reputation and dependability.

CHEVROLET DEALERS National USED CAR SALE

for ONE MONTH

EVEN at ordinary prices, a Used Car gives you more miles of automobile transportation for your dollar than you can get in any other way—because the original owner has stood the heavy first-year depreciation.

Now, we offer you a double bargain . . . Good Used Cars, at phenomenally low prices! We want to clear out our entire stock of used cars to make way for new Chevrolets coming in. It would cost us money to carry them and store them until summer. So we're turning that money over to you; making it worth your while to BUY now.

Look at the cars . . . and the prices . . . and you'll agree you've never seen such values in UNUSED TRANSPORTATION. It's an opportunity that you may never get again.

CANADIANS AS BUTTER EATERS

The people of Canada are the largest consumers of butter in the world. The per capita consumption is 27 pounds yearly, approximately 10 pounds more per head than the people of the United States, which holds second place on the list. The increased home consumption of butter and the demands of the growing tourist trade, have caused a drop in exports, not only of butter, but of other dairy products. While Ontario and Quebec are the largest producers of butter and other dairy products in Canada, the output of the three prairie provinces—Manitoba, Saskatchewan and Alberta—now totals approximately one-third of the total production of the Dominion. Fourteen years ago Western Canada was importing 200 cars of butter annually. Now it exports millions of pounds.

The Penticton Co-operative Growers have made a start with the construction of cold storage and pre-cooling plant here. The Dominion Government is paying half the expenses of construction and installation of machinery.

Teachers in convention in Edmonton last week urged the establishment of vocational high schools. But the people who are paying for the schools find those we already have to be costly enough to maintain. There are a lot of ideals in education which are impossible for a province less than 25 years old to attain.

KIRKCALDY NEWS

Mr. Taylor and family have been visiting with his sister, Mrs. E. Laing. Miss Mildred Olsen entertained twenty-one of her little friends to celebrate her 7th birthday.

Miss Irene Fox spent the week end at the home of her parents, Mr. and Mrs. John Fox.

Mr. and Mrs. Stone and family have removed to Lomond where they will make their home.

Mr. Alden Snyder and Miss Irene motored to Claresholm to spend the week end with their sister Mrs. Vanderberg.

Howard Coulin of Calgary who has been spending the Easter holidays at the home of Mr. Roebuck returned home on Saturday.

Miss McFall who has been spending the holidays at Etzikom returned home on Sunday.

Mr. Hunt and family our new neighbors, have moved on to their new farm south of Kirkcaldy.

There is likelihood of a strong wool market being opened to Alberta sheep growers in Japan. Last year grade samples of Alberta wool were sent to Japan. These were tested and pronounced satisfactory. Japan is now asking for further samples with special attention paid to the inner wools from the ranges in the southern sections of the province. If the samples being collected prove satisfactory, as they are likely to do, the wool industry of the province will develop immensely.

ENSIGN NEWS

Mr. and Mrs. Geo. Marshall spent a few days in Calgary last week on business.

Miss Cecil Masse with Mrs. E. Husky and children returned to Midnapore Tuesday after visiting at the home of Mr. and Mrs. J. Masse.

Ensign church services held every Sunday afternoon in the school house, preaching at 3 p.m. by Rev. J. J. Farquhar, Sunday school at 2:30 by Mrs. A. Smith. Everybody welcome.

Mrs. E. Girard with her two daughters Aline and Gertrude, left for a visit to her brother Mr. W. Moran at Putte, Montana, Wednesday, where they expect to stay for some little time.

Owing to the stormy weather, the members of the Redland Women's Institute has postponed their play for Friday evening 12th at the Ensign school house, 8 o'clock. Everybody come.

Members of the Bible class studies met at the home of Mrs. E. Harris, Tuesday evening, there being a good attendance. Subjects on the chapters of John being chosen. The Rev. J. J. Farquhar gave an interesting reading and explanation on the evening's subjects. Next meeting will be at Mr. A. Smith's. Everybody welcome. Also the following meeting at Miss B. William's, Tuesday evening 16th at 8 p.m.

According to the London Morning Post H.R.H., the Duke of Gloucester will return from Tokyo via Vancouver about June 1st. He will make a tour of the Dominion, and will visit the Prince of Wales ranch at High River. His visit will be purely private and apart from a few invitations no public engagements will be made.
